

When politics, religion, profit and ambition reign supreme...

# Truth Is the First Casualty

Join us for another of Michael Horn's presentations and learn the startling – *unknown* - connection between:

Climate change, global warming, AIDS, 9/11, the two US-Iraq Wars, Ebola epidemic, bio-chipping, BP & Fukushima disasters, NSA spying, the Russian military movements, radical Islamic terrorism, etc.

*...that "just can't be true" – but affect our future survival.*

Michael Horn

- What is truth, what does it mean, why is it important?
- What is the spiritual teaching, how is it different than religions, beliefs?
- Science not superstition, for critical thinkers, scientists and skeptics.

Prepare to question, challenge, be challenged and...decide the truth for yourself.

The truth doesn't take prisoners...it sets them free.
